

Master Plumbers Celebrate Excellence

How a proud industry association recognises its highest achievers

Kyla Ann Jones Hall of Fame Tribute

The Master Plumbers and Gasfitters Association of WA has honoured finalists and winners of the 2023 Plumbing Industry Awards for Excellence in a well-attended gala event at Beaumonde On The Point.

The Awards program has been running for over 25 years and is highly regarded by the plumbing industry. It always attracts many high-quality entries from Association members and strong sponsorship support from the Association's industry partners.

In addition to Award categories that acknowledge the achievements of plumbing businesses owned by Association members, there is a Plumbing Apprentice of the Year category that any fourth-year apprentice in WA may enter.

The event included a moving tribute when the late Kyla Jones was posthumously inducted into the Association's Hall of Fame. Kyla was tragically taken from us last year. This rare honour recognises her many years of dedicated service to the plumbing industry and the Association.

The Master Plumbers and Gasfitters Association of WA has been operating since 1901 and is the only industry body in WA dedicated to representing and supporting licensed plumbing contractors.

The Awards promote the values of a strong professional industry, and the quality of the entries confirms what the Association's media advertising tells consumers: when you need a plumber, always choose a member of The Master Plumbers and Gasfitters Association of WA.
